

Kagan IT'S ALL ABOUT ENGAGEMENT!

We are pleased to provide a second opportunity for Academic Teaming/ Cooperative Structures professional development with KAGAN for up to 30 participants.

Pawtucket is offering the opportunity for ALL teachers and administrators to undergo training in KAGAN (Student Engagement Pedagogy/ Cooperative Learning/Academic Teaming). Developed by Dr. Spencer Kagan and his associates.

LOCATION: Nathanael Greene Elementary 285 Smithfield Ave. Pawtucket, RI 02860 It is REQUIRED to attend all sessions
September 23, 2023 9:00-3:30
October 7, 2023 9:00-3:30
October 21, 2023 9:00-3:30
November 4, 2023 9:00-3:30
November 18, 2023 9:00-3:30

The Kagan Structures have proven themselves to be effective teaching and learning tools for academic teaming/ cooperative learning, multiple intelligences, character education, language learning, and emotional intelligence.

Check out what your colleagues from past cohorts had to say:

The best part of this PD was learning strategies with colleagues that can be implemented right away in any grade and in any subject. These strategies will engage our students and have them communicating and learning from each other. The variety of resources that were provided can be used to help the teacher and the students become successful in teaching and learning new content. Social skills are a focus throughout and are much needed in this ever changing world...

The structures provided new light on cooperative group work as a senior teacher...

Realizing the difference between group work and cooperative learning! Student engagement game changer...

I loved when we were doing the strategies and working in groups. It allowed us to see how the scholars feel and how they think through and use the strategies. This was great so that we could see the possible outcomes and modifications that could be made. Have used some of them with my scholars and they loved it...

Kagan is unlike any other professional development because it brings together all facets of teaching into one program and by meeting monthly, you have the opportunity to start integrating cooperative learning into your classroom and have follow up sessions to continue learning and developing the skills and routines that will create success in the classroom. It truly changes the way we teach and interact with our students and brings to fruition all the ideals of good student centered learning...

Actual hands on for each workshop as to how to implement cooperative learning, i.e. structures-think, pair, share learned how to implement, when to implement and how to be successful. It brings an entire new perspective on how to use cooperative learning from prek-12 grade.

IT'S ALL ABOUT ENGAGEMENT!
